REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the present invention relate to a program circuit for a memory device having an antifuse circuit. The independent claims 52 and 56 recite a program circuit for a memory device having an antifuse circuit comprising means for determining from control signals whether a program voltage is being input from an external interface or from an internal signal line and means for preventing the program voltage from being sent to the external interface while allowing the program voltage to reach the programmable element if it is determined that the program voltage is being input from the internal signal line. The PRIOR ART fails to disclose or suggest such a program circuit for a memory device having an antifuse circuit as described in the independent claims 52 and 56, therefore, claims 52-59 are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vu A. Le whose telephone number is (571)272-1871. The examiner can normally be reached on M-F (7:00-3:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Elms can be reached on (571)-272-1869. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
